COOL DOLLIES FOR TEMPERATURE-CONTROLLED AIRSIDE TRANSPORT

Despite short transfer times between an aircraft and cargo facilities, hot runways can seriously degrade perishables and pharmaceuticals. Our purpose-built Cool Dollies support an unbroken cool chain so that these highly-sensitive commodities, entrusted to us by our customers, enjoy a seamless, controlled environment throughout its journey.

SPECIFICATIONS

Customised dollies for time & temperature-sensitive healthcare shipments.

IATA CEIV Pharmaceuticals and EU GDP proof.

Fully controlled temperature environment between -18°C and 25°C.

Solution for transport of all lower deck ULDs with a maximum height of 1.65 metre and handle loads up to 7 tonnes. 2 x LD3's or 1 x PMC or 1 x PAG capacity.

Red and blue lights as an indication for ambient or cool transport.
